### REASONS FOR ALLOWANCE

1. Claims 1-9 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art of records fails to disclose or render an obviousness of a method for computing a FFT in a plurality of computation stages comprising receiving and storing N data in time-order manner in first memory; storing twiddle factors in bit reversed order manner in second memory; reading R set of data and performing a radix R butterfly calculation on the R set of data; storing the R output values above in sequential memory locations of a third memory; repeating above steps  $N/R*2$  times as seen in an independent claim 9 and further comprising the memory store operation performed in storing has an unity stride which allow R output butterfly data values to be read from contiguous memory locations each time the R output butterfly data values are read from third memory location as cited in independent claims 1, 5, and 8.

The closest found prior art is Kiamilev et al. (U.S. 5,951,627). Kiamilev et al. disclose a photonic FFT processor performing in plurality of computation stages comprising: receiving and storing N data in time-order, twiddle factors in bit reversed order, and performing butterfly. However, Kiamilev et al. fail to disclose the exact above steps are performed repeatedly and the memory store

operation performed in storing has an unity stride as cited above in the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
